jennekilroy@gmail.com

www.linkedin.com/in/jennykilroy

Adelaide-based engineer with 4+ years experience teaching robots to play video games through automation, complemented by confident communication skills from 5+ years in the hospitality industry.

Bachelor of Design (Games)

RMIT, 2018 - 2020

Bachelor of Architecture

The University of Adelaide, 2015-2017

**Mighty Build and Test** *Automation Engineer*

Mar 2022 - Mar 2026

- Tailored diagnostic tooling for client-reporting, bug capture and runtime metrics, improving observability and troubleshooting, reducing TTR periods for live service products.
- Collaborated on AI navigation and utility system framework to automate high volume validations.
- Regularly worked in cross-functional teams to evolve our CI/CD pipelines across rapidly evolving tech stacks to ensure system changes didn't hinder delivery of output.
- Supported onboarding and automation efficiency by documenting best practices for writing C#/.NET, C++, and three proprietary test languages.
- Advocated for code reviews (SVN/GitLab) and leveraging Claude (LLM) to reduce build failures.
- Running client check-ins to identify scope, and generate tasks for continuous testing.
- Proactively sought out PD and senior mentorship opportunities to build-out my technical skill set in full-stack, games and API development.

**Media Molecule** *Dreams Game Developer Internship*

Feb 2020

- Designed and implemented core systems and event-driven functionality in an experimental proprietary engine, supporting the production release under a four week deadline.
- Worked across design, programming and level building disciplines to align the creative vision with the technical execution, and support smooth delivery of features.
- Production management for art and sound designers.
